

EQACC SOLAR

High-efficiency photovoltaic container procurement by the government

Overview

As a clean energy source, photovoltaic (PV) power generation best meets the current demand for energy transformation. In particular, industrial distributed PV projects in China have developed rapidly, forming.

What is a PV supply chain in China?

The background of the case is introduced as follows. Under China's industrial distributed PV policy, there is such a PV supply chain system in Jiangsu, Zhejiang and Shanghai in China, in which a large PSM is responsible for the production of PV system products, and a large PSSP is responsible for the sales and service of PV system products.

How do government subsidies affect the PV industry?

However, lucrative government subsidies often lead to PV enterprises not paying attention to technological innovation and blind production. Therefore, to improve the efficiency of government subsidies, enhance the overall performance of the PV supply chain, and achieve the healthy and long-term development of the PV industry.

Are solar PV supply chains cost-competitive?

Currently, the cost competitiveness of existing solar PV manufacturing is a key challenge to diversifying supply chains. China is the most cost-competitive location to manufacture all components of the solar PV supply chain. Costs in China are 10% lower than in India, 20% lower than in the United States, and 35% lower than in Europe.

How has China shaped the global supply and demand of solar PV?

Government policies in China have shaped the global supply, demand and price of solar PV over the last decade. Chinese industrial policies focusing on solar PV as a strategic sector and on growing domestic demand have enabled economies of scale and supported continuous innovation throughout the supply chain.

High-efficiency photovoltaic container procurement by the government

ESS

China PV module procurement: LONGi, AIKO ...

The procurement specified the use of high-efficiency cell technologies, demonstrating a clear preference for performance and ...
