

EQACC SOLAR

High quality Ifp powerstation in Jakarta

Overview

How much LFP cathode will Indonesia produce a year?

The company plans to produce 50,000 tons of LFP cathode material per year in Indonesia and supply it to local battery producers. Indonesia is expected to initially have demand for motorcycles and ESS batteries. The company plans to produce raw materials tailored to the specifications of these products.

Where are LFP materials produced?

LFP materials produced in Indonesia. We are developing a LFP CAM production facility that supplies raw materials to the electric vehicle ecosystem envisioned by Indonesia. Indonesia is the second-largest automotive producer in the Southeast Asian region, with 900,000 passenger vehicles produced in 2021.

Where is lopal LFP battery plant located?

Lopal's subsidiary Changzhou Liyuan New Energy Technology started building the first phase of the project in July last year, with a 30,000 t/yr output capacity for LFP battery material. The line started pilot production in March. The plant is located in the Kendal Industrial Park in Indonesia's Central Java province.

Where is the LFP plant located?

Our LFP plant will be developed in the Bekasi Industrial Park, located in Bekasi Township, 35km west of Jakarta. Kota Deltamas, where the complex is located, is strategically located in the middle of the Bekasi - Karawang industrial zone. Bekasi Industrial Complex is home to approximately 3,200 manufacturing industries.
