# Highest voltage inverter

## Overview

---

Which solar inverter is best?

The SolarEdge Home Hub is the highest-rated solar inverter on the EnergySage Marketplace, thanks to its top-notch efficiency, solid voltage performance, and extended warranty. It's a 10-kilowatt (kW) optimized string inverter that offers the best of both worlds: plenty of output power and panel-level optimization.

What is the power range of a Samsung inverter?

The power range includes 75K, 80K, 100K, and 125K. The inverter series, which boasts a maximum charge/discharge current of 100A+100A across two independently controlled battery ports, has 10 integrated MPPTs with a string current capacity of up to 20A – ensuring unmatched power delivery.

Are string inverters better than module-level power electronics?

Module-level power electronics (MLPEs) like power optimizers and microinverters maximize electricity production, especially on complex roofs with shading issues. However, string inverters are often a great choice for simpler, unshaded roofs.

How much power does a string inverter have?

Before 2013, 20kW string inverters were considered high-power. In 2014, 28kW appeared, and the 40kW ones followed by in 2015, and the power increased at a rate of 10kW per year thereafter. Until 2017, the 1500V PV system promoted the breakthrough of 100kW inverters, later reaching 200kW and then 300kW.
