How big is the battery storage field

Overview

What is battery energy storage?

Battery energy storage or BESS is a modern energy storage solution that stores energy using multiple battery technologies including li-ion for later use. Batteries receive energy from solar/wind or other energy sources and consequently stores the same in the form of current to later discharge it when needed.

How big is battery energy storage in 2022?

According to the International Energy Agency (IEA), investments in battery energy storage exceeded USD 20 billion in 2022. Moreover, rising investments combined with supportive government initiatives are likely to stimulate the adoption of battery energy storage systems across the globe.

What is the future of battery energy storage systems?

The battery energy storage systems industry has witnessed a higher inflow of investments in the last few years and is expected to continue the same trend in the coming future. According to the International Energy Agency (IEA), investments in battery energy storage exceeded USD 20 billion in 2022.

How battery energy storage systems are driving innovation?

Subsequently, one such facet is significantly driving innovation is Battery Energy Storage Systems that use different battery chemistries to store energy to meet market demand. Siemens is one of the major players in the market.

How big is the battery storage field

**Efficient
Higher Revenue**

**Intelligent
Simple O&M**

**Flexible
Abundant Configuration**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 16A, Compatible with High Power Modules
- IP65 Protection Degree, support outdoor installation
- Smart 11 V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
