How many base stations does Türkiye have for 5G communications

Overview

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

Is Türkiye preparing for a 5G rollout in 2026?

(Photo via Reuters by Sergio Perez) Türkiye is fast-tracking its nationwide 5G rollout, aiming for full transition to the next-generation network by 2026. Minister of Transport and Infrastructure Abdulkadir Uraloglu recently announced the expedited preparations for this significant technological upgrade.

Why is 5G important for Türkiye?

The transition to 5G is viewed as a significant opportunity to reduce reliance on foreign technology and enhance local innovation. Türkiye's broader development strategy, as outlined in the 12th Development plan, emphasizes supporting pioneering technologies that drive green and digital transformation.

Is 5G coming to Istanbul Airport?

Already introduced at Istanbul Airport, 5G technology is set to expand nationwide. The strategic plan includes monitoring and contributing to international standards for 5G and future networks, such as those established by ITU and 3GPP, while encouraging sector participation.
