How much does a 100kW photovoltaic container for use in Australian mines cost

Overview

Is a 100kW Solar System a good investment in Australia?

With broad areas that receive consistent sunlight, it's an excellent place for commercial 100kW solar system installation in Australia. Although Melbourne is known for its unpredictable weather, a 100kW system can still be a good investment, given the state and federal incentives for renewable energy.

How much does a 100kW Solar System cost?

As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate. The graph below – from our Commercial Solar PV Price Index – shows average price trends for 100kW solar systems since Solar Choice started keeping track in May 2014.

How much does solar power cost in Australia?

Accordingly, the uptake of commercial solar power has increased significantly in Australia in the last several years. As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate.

Should you buy a solar inverter for a 100kW Solar System?

It would actually be cheaper to channel the surplus power back to the grid or invest that money in a bigger solar system. With inverters for commercial solar systems, you want to ensure that they are almost the same size (in watts) as your solar system. So, your 100kW solar system should have a 100,000W solar inverter.
