## Overview

---

Are storage units expensive in Costa Rica?

Of course there's a wide range of costs depending on size, security, location and climate control options but one thing is consistent – storage units are expensive in Costa Rica.

How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.

How to find a mini-storage unit in Costa Rica?

The most important thing to know about trying to find a mini-storage or self-storage unit in Costa Rica is that they are called “mini-bodegas”. Google translate will tell you that means “small winery” but don't let that confuse you. Searching online for “self-storage in Costa Rica” you won't find many so try “bodega” instead.

What are energy storage technologies?

Energy storage technologies, store energy either as electricity or heat/cold, so it can be used at a later time. With the growth in electric vehicle sales, battery storage costs have fallen rapidly due to economies of scale and technology improvements.
