# How much does a home inverter cost in Dakar

## Overview

---

How much does a solar inverter cost?

The overall cost breakdown shows that while necessary, inverters are a relatively small part of the total investment in solar technology. After applying tax credits, the total cost to install a solar system, inverter included, comes to between \$10,600 and \$26,500. In 2023, there was a 15% drop in the price of residential systems.

How much does a microinverter cost?

While they cost more than string inverters, averaging \$1.15 per watt, they offer the benefit of independent panel optimization. For a 5 kW system, the cost is approximately \$5,750. Microinverters generally come with warranties of around 25 years, which aligns with the expected lifespan of the solar panels themselves.

How to choose a solar inverter?

The key is to align your budget, performance needs, and long-term goals with the right inverter technology. The latest 2025 solar inverter prices by top brands like Huawei, Growatt, SMA, RENYUAN, and DEYE. Compare models, features, and global trends to make the best choice for your solar project.

Why are solar inverters so expensive?

Several factors influence the solar inverter price: Inverter Type: String, hybrid, and micro inverters vary significantly in cost. Power Output: Higher power ratings demand higher prices. Technology Features: Smart monitoring, MPPT channels, and energy storage integration. Brand: Premium brands like SMA or Fronius tend to be more expensive.
