# **How much electricity does solar panels generate in Brno Czech Republic**

## Overview

---

How much does solar energy cost in Czech Republic?

In the Czech Republic, the average annual energy yield for solar photovoltaic (PV) systems is approximately 1,000 to 1,200 kWh per kWp installed. 2 As of June 2024, the average cost of electricity for households in the Czech Republic is approximately \$0.36 USD per kilowatt-hour (kWh). 3.

How many solar power plants are there in the Czech Republic?

At the end of 2021, there were over 50,000 photovoltaic power plants with an installed capacity of about 2200 MWp in the Czech Republic. There were 500 solar parks with a capacity of over 1 MWp. During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp.

How much solar power does the Czech Republic have in 2021?

In 2021, the Czech Republic will have a solar installed capacity of around 2119 MW, with a renewable energy capacity of around 4415 MW. Czech Republic's renewable energy shares around 21.1% of the total electricity generation in the country.

Why is solar energy so unpopular in the Czech Republic?

Solar energy has long been unpopular among Czech politicians since high compensation led to an uncontrolled boom in solar in 2009-2010, costing around 1.8 billion of euros in subsidies per year to the sector split between consumers and the government. The bill also raises special taxes paid by solar plants built in 2009-2010.
