# **How to calculate the price of factory energy storage cabinet**

## Overview

---

How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.

How much does commercial battery storage cost?

For large containerized systems (e.g., 100 kWh or more), the cost can drop to \$180 - \$300 per kWh. A standard 100 kWh system can cost between \$25,000 and \$50,000, depending on the components and complexity. What are the costs of commercial battery storage?

.

How much does a solar system cost?

\$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels. For large containerized systems (e.g., 100 kWh or more), the cost can drop to \$180 - \$300 per kWh. A standard 100 kWh system can cost between \$25,000 and \$50,000, depending on the components and complexity.
