How to check the network battery cabinet model

Overview

How do I connect a battery cabinet to a power system?

Procedure 1. Furnished with the battery cabinet are battery disconnect circuit breaker alarm lead assemblies. Refer to the power system installation manual to use these alarm leads to connect the battery cabinet battery disconnect circuit breaker alarm into the power system alarm circuits.

How do you mount a battery cabinet?

The battery cabinet is designed to mount on a wall or a standard 23" wide relay rack. Refer to Figure 3 and install the 23" relay rack mounting angles to the battery cabinet. Mounting hardware is provided with the battery cabinet. Torque these connections to 46 in-lbs. Install battery retention strap through openings in rear of cabinet.

How many battery cabinets can be connected together?

The battery cabinet is designed to be daisy-chained together with additional battery cabinets. There is no limit to the number of battery cabinets that can be connected together. However, a maximum system current of 30 A should be maintained regardless of the number of interconnected battery cabinets. Procedure NOTE! Refer to Figure 7.

How do I install a VDC battery cabinet?

Set first battery in cabinet and attach the long lead (fast-on connector side marked positive) from the cabinet to the fast-on terminal on the positive terminal of the battery. See Figure 24.
