How to communicate without a base station in Apia

Overview

Do Arlo cameras need a base station?

With just a few simple steps, you can have your camera connected to your Wi-Fi network and be able to access live video footage from anywhere using the Arlo app. So, whether you are looking to improve the security of your home or office, Arlo cameras are a great option that can be easily set up without the need for a base station.

What is a base station?

A base station is a hub that connects wirelessly with your Arlo cameras and allows them to communicate with the internet. It also acts as a bridge between your camera and your smartphone or computer, allowing you to access live video feeds and settings remotely.

Do I need a base station?

However, not everyone needs a base station, especially if they only have one or a few cameras to set up. Before getting started, make sure you have the following items: To begin the setup process, download the Arlo app from the App Store or Google Play Store on your smartphone.

Can I use Arlo pro 2 without a base station?

In conclusion, it is possible to use the Arlo Pro 2 camera without a base station. However, it is important to keep in mind that without a base station, the cameras will not be able to receive updates or be able to use two-way audio. Additionally, the cameras need to be connected to a Wi-Fi network before they can be used.
