

# How to install the aluminum block of the base station power supply

## Overview

---

How do I set up a base station?

Set up the base station using either the tripod or T-bar mounting method. You must use an external radio antenna kit for the internal 450 MHz or 900 MHz radio. To avoid interference between the 900 MHz radio and GPRS transmissions, do not mount the external radio antenna within 1 m (3.3 ft) of the GSM antenna.

How do I connect a PSU to a motherboard?

Otherwise, make sure the following cables are plugged in before placing the PSU inside the case: 24-pin power connector: Supplies power to your motherboard, which then distributes power to all the internal components. CPU power connector: Provides power to the processor. You might need 2x 8-pin connectors, so check your motherboard.

How do I install a power supply (PSU)?

Before installing the power supply (PSU), make sure to install the motherboard in your PC case, along with all the core components such as the CPU (possibly the Intel Core i9-13900K), memory (RAM), and storage drives. You must also have your hard disk drives (HDD) and 2.5-inch SATA SSDs pre-installed in your case before the PSU installation.

What should I know before installing a power supply (PSU)?

Also, wear an anti-static bracelet during installation to prevent electrostatic damage. Before installing the power supply (PSU), make sure to install the motherboard in your PC case, along with all the core components such as the CPU (possibly the Intel Core i9-13900K), memory (RAM), and storage drives.
