# **How to select the bidding price for a 15MWh mobile energy storage container**

## Overview

---

What is the bidding strategy for energy storage capacity?

Velazquez et al. base their bidding strategy on the study of the residual demand curve. The bidding of energy storage capacity on the electricity market adds a layer of complexity. The battery has a limited capacity and accumulates revenue by scheduling efficiently generation and load modes. J. Arteaga et al. develop price-taker.

What is the average bid price for energy storage systems?

Energy storage system bid prices hit a record low In the first three quarters, the average bid price for domestic non-hydro energy storage systems (0.5C lithium iron phosphate systems) was 622.90 RMB/kWh, a year-on-year decline of 50%.

What was the average bid price for non-hydro energy storage systems in Q3?

In the first three quarters, the average bid price for domestic non-hydro energy storage systems (0.5C lithium iron phosphate systems) was 622.90 RMB/kWh, a year-on-year decline of 50%. While bid prices remained relatively stable in the first half of the year, they reached a historic low of 578.11 RMB/kWh in Q3, particularly in September.

Are energy storage contracts a viable option in Texas?

These contracts are particularly prevalent in Texas, which is an energy-only market (i.e., there is not a separate market for the sale of capacity). As a result, many energy storage resources will enter into hedges that will provide them with some fixed revenue streams to facilitate a project financing.

## How to select the bidding price for a 15MWh mobile energy storage

### Resilient Market Bidding Strategy for Mobile Energy Storage ...

Request PDF , On , Kaijie WANG and others published Resilient Market Bidding Strategy for Mobile Energy Storage System Considering Transfer Uncertainty , Find, read and ...
