

How to turn on the power of a battery cabinet individually

Overview

What is a battery cabinet (IBC) system?

Battery Cabinet (IBC) systems are housed in single free-standing cabinets. Model IBC-L with a single battery voltage range is available to meet application runtime needs. Up to four cabinets may be installed to further extend battery runtimes. The cabinets match the UPS cabinet in style.

How do I install a battery cabinet?

Install the battery cabinet in a location that is accessible for maintenance. Between each battery cabinet and the UPS or battery disconnect using conduit. Battery cabinets may be installed adjacent to the UPS or in a separate location. If the battery cabinet is installed adjacent to the UPS, the recommended installation location for the battery cabinet is on the right side of the UPS cabinet.

How do I connect a UPS to a battery cabinet?

Locate the UPS-to-battery cabinet breaker sensing cable inside the first battery cabinet. Mate the connector on this cable with the matching connector in the cabinet (see Drawing 164201536-8 on page A-17). Route the other end of this cable through conduit (top or bottom entry) to UPS cabinet and connect to terminal strip TB2.

How do I connect a Powerware 9390 UPS to a battery cabinet?

Refer to the appropriate Powerware 9390 UPS Installation and Operation Manual, as referenced in paragraph 1.6, for UPS cabinet terminal locations. A UPS-to-battery wiring harness is supplied inside the first battery cabinet. Use pressure and bus bar terminations, as necessary, for connecting cables between the UPS and battery cabinet.
