How to use the base station mini power supply

Overview

Does my Starlink mini need power?

Here's a complete list of what you need to power your Starlink Mini, both from home and while traveling. Yes, your Starlink Mini does need power to run. But the good news is that you can readily pick from a variety of sources most convenient for you.

What's your goal with a Starlink mini power bank?

My overall goal is working while in spots with no power/internet since my wife and I work from home. The technical goal is to have a power bank and solar panel that can run the Starlink Mini and recharge laptops a couple times a day (MacBook and general HP laptop), and that's all this power bank will be doing.

Will a USB-C Power Delivery brick work with a Starlink mini?

Both will work just fine with the Mini as the dish supports input voltages from 12V to 48V. To use a USB-C Power Delivery brick as the Starlink Mini's power source, first make sure it's rated at a minimum of 20V, 5A (100W). Otherwise, it won't be enough to power the Mini.

Can a portable power station run a Starlink?

Since portable power stations come in a wide range of capacities, they can easily run any Starlink model for short or long periods, depending on your model. For off-grid solutions, just recharge it using solar panels, and you can stay connected anytime from anywhere for as long as you need it.
