

EQACC SOLAR

Huawei Chile Energy Storage Project

Overview

In collaboration with the Chilean group oEnergy, it inaugurated a Small Distributed Generation Means (Pequeños Medios de Generación Distribuida, PMGD) photovoltaic plant with lithium battery storage in the municipality of San Javier (Maule Region). Is ENGIE launching a battery energy storage system in Antofagasta?

Utility and independent power producer (IPP) Engie has started commercial operations of a 139MW/638MWh battery energy storage system (BESS) in the northern region of Antofagasta, Chile. The BESS Coya project, which uses lithium-ion (Li-ion) batteries and has a 5-hour duration, has been paired with the 180MW solar PV plant of the same name.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Which countries will participate in the Energy Storage Summit Latin America?

Returning for the third edition in Santiago, Chile, the Energy Storage Summit Latin America will explore opportunities in countries such as Chile, Peru, Colombia, Argentina, Brazil and Mexico.

What is the largest battery energy storage system in Latin America?

ENGIE obtained approval from the National Electricity Coordinator (CEN) to start commercial operation of BESS Coya, the largest battery energy storage system in Latin America to date. This system has a storage capacity of 638 MWh, with 139 MW of installed capacity.
