

Huawei exports energy storage products to Bolivia

Overview

Why did Bolivia become a net importer of fuel in 2022?

After 30 years of being a hydrocarbon exporting country, Bolivia became a net importer of fuel as of April 2022. Higher fuel prices and a decade of reduced exploration and production of natural gas are factors to this deficit. Future opportunities may be found in the areas of exploration, drilling, and natural gas production.

Which companies make electricity in Bolivia?

These companies fall under ENDE (the National Electricity Company). Bolivia's electricity production is based on thermoelectricity (71 percent), hydroelectricity (20 percent), and solar and wind (9 percent). The best sales prospects are with hydrocarbons: natural gas-related machinery, equipment, and production.

How many electricity projects are there in Bolivia?

Bolivia currently has over a dozen electricity generation projects (hydroelectric, solar, combined cycle, and geothermal) and transmission line projects in progress and over 30 projects under study, including the construction of two biomass power plants. Bolivia plans to invest billions towards expanding its electric grid through 2025.

What percentage of electricity is distributed in Bolivia?

The nationalized electricity distribution companies account for 51 percent of the distribution market. These companies fall under ENDE (the National Electricity Company). Bolivia's electricity production is based on thermoelectricity (71 percent), hydroelectricity (20 percent), and solar and wind (9 percent).
