Huawei s energy storage in Portugal s Porto participates in electricity trading prices

Overview

How is energy trading facilitated in Portugal?

Portugal's energy trading activities are facilitated through various platforms, each catering to different segments of the market: OMIP (The Iberian Energy Derivatives Exchange): OMIP provides a marketplace for trading electricity derivatives, including futures, swaps, and options, covering both Portugal and Spain.

How many GWh of electricity is produced in Portugal?

Between January 1st and May 31st of 2023, 18,751 GWh of electricity were generated from Continental Portugal, from which 73.2% came from natural resources (sources (30.5% wind, 28.30% hydro, 7.6% bioenergy and 6.8% solar). Other sources include: Natural Gas (15.9%), Fossil CHP (4.7%), and Pumped Storage (6.2%).

Is Portugal a good place to invest in energy?

Portugal stands as a vibrant and progressive player in the European energy landscape, distinguishing itself through a robust commitment to renewable energy sources. With a significant portion of its electricity generation stemming from hydro, wind, and solar power, the country presents an attractive market for energy traders.

Why is Portugal so dependent on imported energy?

Portugal ranks as the 11th EU member state most dependent on imported energy sources, with a decreasing dependence since 2000, when 85% of its energy was imported. This is mainly due to the lack of fossil energy sources, which continues to impact the total consumption of primary energy significantly.
