Hungary develops flow battery factory in Pécs

Overview

The Chinese battery cell manufacturer and BMW partner Eve Energy has started construction of its first European battery cell factory in Hungary. Why are EV traction batteries made in Hungary?

Over the last years, many of the leader EV traction battery manufacturers and their suppliers chose Hungary as the location of their newly established manufacturing plants. This is in line with the goal of the Hungarian government to become one of the main battery producer countries not only in Europe, but also at global level.

Who makes EV batteries in Hungary?

The only exception is BYD, which operates (among others) a bus assembly plant in Hungary and uses its own batteries. In below, we provide a slight overview about the EV battery producer companies which already operate manufacturing plants in Hungary or announced to do so in the near future.

Which Chinese EV battery companies are launching a European production plant in Debrecen?

In May 2023, another major battery industry investment was officially announced on the Hungarian media: EVE Power, another powerful Chinese participant of the EV battery industry, will establish its first European production plant in Debrecen.

Should Hungary invest in EV battery plants?

Within the European Union, Hungary puts a particularly high stake on EV battery plants, in the hope that it will find itself among the leading countries of an emerging industry within a few years. Commitment to green mobility is not the only motivation for attracting large battery manufacturers to the small Central European country.
