

EQACC SOLAR

India Construction Investment Energy Storage Project

Overview

What is strategic paths for energy storage in India through 2032?

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, highlights priority areas, and explores how different technologies can work for us.

What is the status of pumped storage projects in India?

The status of pumped storage projects in India Energy storage is critical towards ensuring grid reliability, security, and cost optimisation given India's growing share of renewable energy in its power purchase mix.

How many hydro pumped storage projects in India in 2024-25?

The Central Electricity Authority (CEA), under the Ministry of Power, Government of India, has concurred Detailed Project Reports (DPRs) of following 6 Hydro Pumped Storage Projects (PSPs) of about 7.5 GW in record time during 2024-25, marking a key milestone in India's ongoing commitment to developing advanced long term energy storage solutions:.

How is India advancing energy storage solutions?

At the heart of this momentum is the strategic push by the Government of India and various state authorities, backed by institutions like SECI, NTPC, and SJVN, to advance energy storage solutions. A landmark initiative includes the approval of Viability Gap Funding for 13,200 MWh of battery energy storage systems by 2030-31.

India Construction Investment Energy Storage Project

IFC Invests Rs 460 Crore in IndiGrid's Energy Storage Project

IFC commits INR460 crore to IndiGrid for India's largest battery storage project in Gujarat, boosting clean energy and grid reliability.
