# Indian solar Energy Storage Plant

## Overview

---

This innovative project, supported by the World Bank and Climate Investment Fund, enables the storage of solar energy generated during the day for use during peak evening demand, marking a first for India on such a large scale. What is India one solar thermal energy storage system?

The India One Solar Thermal Energy Storage System is a 1 MW solar thermal power plant located in Abu Road, Rajasthan, India. It uses thermal energy storage to provide round-the-clock power. Commissioned in 2017, the project was designed, developed, and installed by Brahma Kumaris and the World Renewal Spiritual Trust (WRST).

Is India's largest battery energy storage system powered by solar energy?

In February, the Solar Energy Corporation of India (SECI) commissioned India's largest Battery Energy Storage System (BESS), powered by solar energy.

Which is the largest solar power plant in India?

Overview: Located in the Thar Desert near Phalodi, this sprawling utility-scale solar park covers 56 sq km and was commissioned in phases from 2015 to 2020. Why it's the largest solar power plant in India: With a capacity of 2,245 MW, Bhadla remains the nation's top solar installation and one of the world's largest.

How big is India's energy storage capacity?

As of March 2024, India achieved a significant milestone, with a total installed energy storage capacity of 219.1 MWh, or roughly 111.7 MW. This reflects the country's commitment to advancing energy storage technology and improving its energy infrastructure.
