Indonesia Surabaya Industrial and Commercial Energy Storage Investment Project

Overview

The SETI project, a joint effort between the Indonesian and German governments, is designed to accelerate the decarbonization of the industrial and building sectors through the adoption of renewable energy and integrated energy conservation practices. Is Surabaya a pilot city for energy transition in Indonesia?

Surabaya, Indonesia Sentinel — Surabaya, the capital of East Java, has been selected as a pilot city for energy transition and efficiency efforts in Indonesia. The city officially launched its building sector decarbonization program on April 12, under the Sustainable Energy Transition in Indonesia (SETI) initiative.

Can Surabaya become an example for other cities?

“Surabaya City Government will receive technical support, planning studies, capacity building, and participation in urban energy networks through this SETI project. With this support, it is hoped that Surabaya can become an example for other cities in carrying out the energy transition towards better sustainability,” said Johannes.

Why is battery energy storage important for Indonesia's energy transition?

Priority Actions for Market Development: Battery Energy Storage Systems constitute essential infrastructure for Indonesia's energy transition and industrial development objectives. The technology addresses multiple requirements including renewable energy integration, grid stability in fragmented networks, and reliable power for economic activities.

Is Surabaya a sustainable city?

Surabaya city officials expressed enthusiasm about being selected for the pioneering project. City Secretary Ikhsan highlighted ongoing sustainable initiatives, such as the energy-efficient City Hall building and the Joyoboyo Intermodal Terminal, which utilizes environmentally friendly materials.
