# Indonesia solar Energy Storage Project

## Overview

---

This integrated solar energy project is not only the largest new energy project in Indonesia, but also an important demonstration for promoting local energy transformation. The project is jointly invested by Singapore's Shengke Industrial Group and Indonesia's SESNA company, with China Yongfu Electric Power Design Co., Ltd. as the EPC general contractor responsible for the overall construction. Will Indonesia build a 100 GW solar power plant?

Jakarta, Aug- Indonesia will build a 100 Gigawatt (GW) Solar Power Plant (PLTS). The program plans to build 80 GW of solar power plants and 320 GWh of Battery Energy Storage System (BESS) to be managed by the Merah Putih Village Cooperative (KDMP) in 80,000 villages, and 20 GW of Centralized solar power plants.

What is Indonesia's largest integrated solar energy storage project?

Indonesia's largest integrated solar energy storage project--Seetao 200MW+80MWh □ Indonesia's largest integrated solar energy storage project On J, Morowali Industrial Park in Sulawesi Province, Indonesia welcomed a milestone clean energy project - a 200MW photovoltaic power station with an 80MWh energy storage system.

Can solar power plants be used in Indonesia?

Indonesia possesses solar energy potential with a capacity ranging from 3,300 GW to 20,000 GW, spanning from Sabang to Merauke. With increasingly affordable, modular, and easy-to-build and operate solar power plant (PLTS) technology, this project could serve as a strategic solution to provide reliable and affordable energy access across Indonesia.

What is Indonesia's solar energy plan?

This initiative comes two months after the Indonesian government ratified a plan to add 42.6GW of renewable energy capacity and 10.3GW of energy storage by 2034. The plan aims to support the country's state-owned electricity company, for which solar PV will make up the bulk of the

renewables, with 17.1GW.
