Industrial and commercial energy storage batteries in New York USA

Overview

What is the New York battery & energy storage technology consortium?

The New York Battery and Energy Storage Technology (NY-BEST™) Consortium, established in 2010, serves as an expert resource for energy storage-related companies and organizations looking to grow their business in New York State.

Is grid-scale battery energy storage advancing in New York?

The development of grid-scale battery energy storage in New York is entering a critical phase. More than 19 GW of battery energy storage projects are advancing through NYISO's reformed interconnection process, the first major test of its new cluster study.

Which city has the most battery energy storage capacity in New York?

Location and the economics of siting a battery The Hudson Valley (Zone G) contains the most proposed battery energy storage capacity in New York's queue. Its Net Cost of New Entry (Net CONE) is lower than New York City's and roughly in line with the state average, offering developers moderate entry costs.

Will battery storage play a role in New York's energy future?

Battery storage is set to play a crucial role in New York's energy future. The path forward is clear: those looking to join in on New York's battery storage potential must act decisively, choose their locations wisely, and be prepared for a competitive landscape.
