

EQACC SOLAR

Industrial grade 48v inverter

Overview

What is a 48 volt inverter?

In other words, it is a device that can take current from a bank of batteries (48V) and convert it to the type supplied in the grid to power your appliances and devices. I suggest you use A 24-volt inverter or 36-volt inverter or 48-volt inverter when you need to power appliances over 3000 Watts.

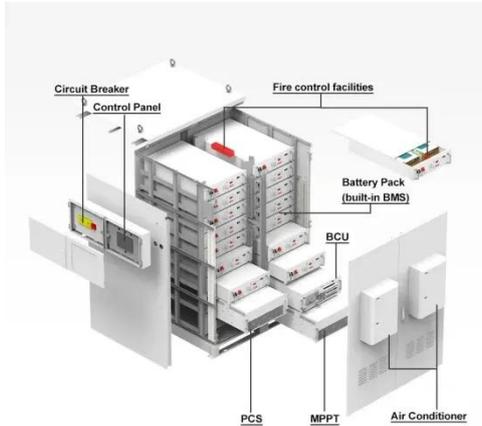

What is a commercial grade inverter?

Inverters provide a reliable source of mains power while working remotely. This range of commercial grade inverters provide an AC mains power source from the vehicle battery, allowing operation of mains powered electrical equipment on the move. We have a wide range of pure sine wave and modified sine wave inverters for 12V inverters.

What is a pure sine wave inverter?

Rugged, heavy duty and industrial grade 3-phase pure sine wave DC/AC inverters, 24V, 48V, 125V or 250VDC inputs available. 208VAC or 380VAC or 415VAC output, 60Hz, 50Hz, or 400Hz, 9000 watts. Pure sine wave output exactly duplicates mains power. Extra heavy filtering to isolate noise from equipment sharing the same battery

Industrial grade 48v inverter

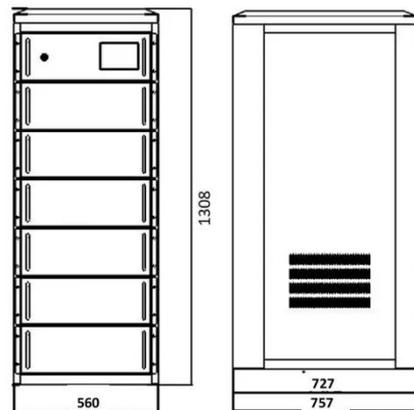

5000 Watt Pure Sine Power Inverter - 48V 50/60 Hz

5000 Watt Pure Sine Inverter - Industrial Grade - 48 VDC 50 & 60 hz AIMS Power is proud to bring you this new 5000 Watt Pure Sine Power Inverter, designed for harsh ...
