Install Solar Onsite Energy solar

Overview

How do I install solar energy onsite?

There are a couple ways to go about installing solar energy onsite: one is financing the installation yourself and another is entering into an onsite power purchase agreement (PPA) with a developer.

When is a solar system considered an onsite system?

When a solar system is installed directly on the purchaser's property, and the renewable energy that it produces is consumed there, it's considered an onsite system.

How do I install a solar system in my pool?

To install a solar system in your pool, first cut the line between the filter and the heater. Then, install the 2" PVC check valve in the direction of the flow.

How do I install the Solar client?

To install the Solar client, you need to access the server using Java. Make sure you have Java 6 installed (available on the web start page below). You will require the correct web start URL to enter in your web browser. To obtain this information, you need to know two pieces:
