# **Install UPS uninterruptible power supply**

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supplies (UPS) safeguard your electronics against power outages, surges, and fluctuations. Whether you are setting up a UPS for a home, a UPS for an office, or a UPS for a data center, this beginner's UPS setup guide will walk you through every aspect of the UPS installation process.

What is a ups & how does it work?

Let's get started! What is a UPS?

A UPS (Uninterruptible Power Supply) is a backup power supply device that provides power when your regular power source fails or voltage drops to an unacceptable level. It bridges the gap between a power outage and the time required for a backup generator to start or for a safe system shutdown.

How do I install a hardwired UPS system?

Hardwired UPS systems should be installed by a UPS specialist or the UPS supplier. The first step in installing a UPS system is to determine the power needs of your facility. This includes identifying the number and types of devices that will be connected to the UPS, as well as the total power consumption of those devices.

Why should you install an UPS system?

Installing a UPS system is an important step in protecting your facility's electronic equipment and ensuring that it stays up and running during power outages.
