Installation requirements of battery cabinet in computer room

Overview

What should be included in a battery cabinet?

According to 527 CMR 10 Massachusetts, battery cabinets should be provided with exterior labels that identify the manufacturer and model number of the system and electrical rating (i.e., voltage and current) of the contained battery system. Additionally, signs shall be provided within battery cabinets to indicate the relevant electrical, chemical, and fire hazards.

How should a battery room be located?

This will reduce the cost and exposure of the dc distribution system. The battery room shall be located in a way that provides access for lifting equipment to be used during initial installation and future maintenance operations. The location shall be as free from vibration as practical.

Where should batteries be installed in a substation?

Batteries installed in unit substations, electrical equipment rooms and instrument rack rooms shall comply with the requirements of this section, Main Substation Design and Unit Substation Design. In these locations, stainless steel hoods vented to the outside shall be installed over batteries.

Do vented lead acid batteries need a separate battery room?

Vented lead acid batteries installed in medium voltage main substation buildings and unit substations, electrical equipment rooms and control system rack rooms shall not require a separate, dedicated battery room and shall be in accordance with SES E14-S02. The battery room and installation shall comply with IEEE 484, NFPA 70 and OSHA 29 CFR.
