

**EQACC SOLAR**

# **Integrated base station power supply maintenance**

## Overview

---

In order to ensure the safe, punctual and efficient operation of Shanghai urban rail transit and ensure the stable operation of power supply system. It is necessary to build an integrated intelligent opera.

What is intelligent operation & maintenance system for power supply facilities & equipment?

An intelligent operation and maintenance system for power supply facilities and equipment of “standardization, responsibility classification, resource coordination configuration, information coordination, and service-centric” for professional management of power supply has been formed.

What is the interface between power supply business system & intelligent operation & maintenance?

The interface between the power supply business system and the power supply system intelligent operation and maintenance platform should have integrity, standardization, openness and flexibility [10, 11]. The interface definition follows the principles of easy to understand, easy to use, easy to communicate, and easy to expand.

What is power supply system intelligent operation & maintenance platform software?

The power supply system intelligent operation and maintenance platform software meets the asset management requirements and standards of Shentong Metro Group, and has the ability of data synchronization with EAM system of the group.

What is a substation integrated automation system (ISCS)?

On the hardware, the central data server, disk array, history server and other equipment of ISCS system are shared to uniformly process the received information provided by substation integrated automation system.
