# **Integrated solar street light**

## Overview

---

What are integrated solar street lights?

Integrated solar street lights simplify installation by eliminating the need for trenching or complex wiring. They are ideal for remote or off-grid locations, providing sustainable lighting solutions that reduce energy costs.

What are all-in-one solar street lights?

All-in-one solar street lights combine solar panels, LED luminaires, batteries, controllers and brackets into a single, compact unit. For municipal and commercial projects, they dramatically simplify design and installation while delivering reliable, off-grid lighting in streets, parks, campuses and industrial sites.

Why should you choose integrated solar street lights?

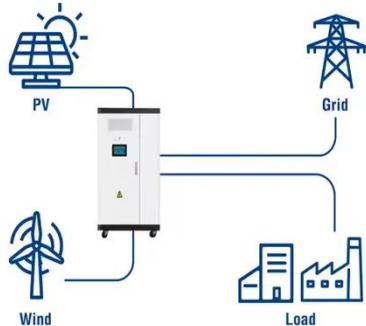

Integrated solar street lamp promotes safety for drivers as their illuminance is greater than traditional street lights. You can install them effectively on main roads, highways, rural roads, and roadways. Installation is very easy and price per street light unit is cheaper than other brands.

What is the best solar street light?

MHL can achieve 12 hours of full brightness without dimming mode to keep it super bright for the whole night to meet your project needs. FL Series - Super Bright All-in-one Solar Street Light to light up Africa. Classic all-in-one/integrated design, well-favored by the market. By using Cree led chip (150lm/w) with LiFePO4 lithium battery.
