

**EQACC SOLAR**

# **Inverter battery voltage selection**

## Overview

---

Answer: To choose the right inverter for lithium batteries, match the inverter's voltage and capacity to your battery's specifications, prioritize pure sine wave inverters for efficiency, ensure compatibility with lithium battery chemistry, and factor in safety features like overload protection. How to choose a battery for an inverter?

When selecting the battery for inverter, it's essential to consider factors like usage pattern, backup duration required, inverter compatibility, and environmental conditions. What is Battery Mode in an Inverter?

### What is an inverter battery?

An inverter battery is a specially designed energy storage solution that powers an inverter during electricity outages. Unlike automotive or starter batteries—which provide short bursts of high current to start engines— inverter batteries are built for deep-cycle performance, meaning they release a steady amount of energy over a longer duration.

### Do inverters need batteries?

For most residential and small commercial setups, the traditional battery and power inverter combo is the preferred choice to ensure continuous power supply during blackouts. So, while some inverter types do not require batteries, if your priority is uninterrupted backup power, investing in a quality battery in inverter system is essential.

### How do I choose a home inverter?

Assess your total load to calculate the needed capacity accurately. Voltage Compatibility: Most home inverters use 12V batteries, but larger systems may require 24V or 48V setups. Always ensure the battery voltage matches the inverter specifications. Load Requirement: Know the wattage of appliances you want to run on backup.

**Outdoor Cabinet BESS**  
50 kWh/500 kWh Battery Storage System  
Industrial and Commercial Energy Storage

**Features:**

- All In One: Integrating battery packs
- High-capacity: 50-500kWh
- Degree of Protection: IP54
- Operating Temperature Range: -20-60°C (Derating above 50°C)
- Intelligent Integration: Integrated photovoltaic storage cabinet
- Rated AC Power: 50-100kW
- Altitude: 3000m(>3000m derating)

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion
