

EQACC SOLAR

Inverter retrofit battery

Overview

What is a retrofit solar battery solution?

Our retrofit solar battery solution is tailored for homes with existing solar panel systems and solar inverters. By simply retrofitting a battery system, users can optimise their existing solar panel setups with minimal investment and reduce electricity bills. The easy and cost-effective PV-coupled retrofit battery solution like no other.

Can you add a battery to a solar inverter?

It's relatively easy to add a battery to your existing solar panel system, but the level of ease depends on the type of solar inverter you have. If your inverter isn't compatible with a battery, the simpler and more affordable solution is to install an AC-coupled battery system.

Can a solar battery be retrofitted?

It's simple: by never wasting electricity again. This is achievable thanks to EcoFlow's innovative home solar battery storage technologies. Our retrofit solar battery solution is tailored for homes with existing solar panel systems and solar inverters.

Can a string inverter be used as a backup battery?

It can effectively upgrade any existing string inverter system by adding a backup battery. Capable of being grid-interactive, it allows users to store surplus power and sell it back to the grid when demand peaks and the price of electricity is at its highest.
