

## EQACC SOLAR

# Inverter that can be used outdoors

## Overview

---

Can solar inverters be installed outdoors?

Yes, solar inverters can be installed outdoors. Many modern solar inverters are designed to be waterproof, dustproof, and weather-resistant to various weather conditions. When installing, avoid exposing them to excessive sunlight or high temperatures. It is best to choose a shaded area and ensure good ventilation.

Are solar inverters weatherproof?

They are generally weatherproof and built to withstand outdoor conditions. However, it is crucial to protect them from extreme weather and potential physical damage. Before we dive into the practicalities of installing a solar inverter outdoors, let's take a moment to understand this vital piece of hardware.

Are inverters suitable for home use?

These inverters are suitable for home use. We offer 2 systems (12v or 24V) and then have provided different battery options to suit your budget. The more cost effective option comes with the Royal 100Ah Standard Deep Cycle Batteries.

What is a solar inverter & how does it work?

A solar inverter is one of the most critical components of a solar power system. After harnessing sunlight and converting it into DC power by the solar panels, we still need one crucial step before we can use this power: conversion to AC. That's where the solar inverter comes into play.
