

# Investment in an environmental protection project using a 150-foot collapsible shipping container

## Overview

---

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

Do financial investors contribute to sustainable investment in containerships?

The findings suggest that financial investors have significantly contributed to the sustainable investment in containerships by prioritizing eco-ships investment. The pivotal role of financial investors in advancing eco-friendly maritime assets is revealed for the first time, to the best of our knowledge.

Do investors prefer ecoships over containerships?

The intertwined relationship among vessel value, investors and vessel specifications is investigated using a Structure Equation Model. A 18% price green premium is identified in the containership vessel value for ecoships. Financial buyers are shown to have preference over ecoships.

Do second-hand container eco-ships have a green price premium?

The finding confirms the presence of a green price premium for the second-hand container eco-ships. Furthermore, financial buyers, who typically act as lessors in the financial leasing of ships in the shipping industry, have shown a more pronounced inclination towards investing in container eco-ships compared to operating buyers.
