

EQACC SOLAR

# Ireland Zhonghui Energy Storage Project

**Nominal Capacity**

**280Ah**

**Nominal Energy**

**50kW/100kWh**

**IP Grade**

**IP54**

## Overview

---

Will SSE build a battery energy storage system in Ireland?

SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable energy company Low Carbon which, if approved for final delivery, could be constructed and operational by the end of decade.

Are battery energy storage systems a 'great achievement' in Ireland?

ESB Networks described the project as a "great achievement for battery storage" in Ireland. Battery energy storage systems, often referred to as Bess, are regarded as a vital part of the Ireland's fledgling renewable energy sector and demand for them has never been higher.

How much battery storage do we need in Ireland & Northern Ireland?

In 2021 energy experts Baringa estimated that to hit the 80 per cent renewable electricity targets in Ireland and Northern Ireland by 2030 we would need at least 1,700 MW of battery storage on the island of Ireland. Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power.

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.
