

**EQACC SOLAR**

# **Ireland solar Energy Storage Power Generation System**

## Overview

---

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

Why is battery storage important in Ireland?

This showcases the growing capacity of Ireland's energy storage systems and their pivotal role in ensuring energy supply during times of peak demand. Battery storage is becoming increasingly essential in managing the intermittent nature of renewable energy sources and reducing our reliance on fossil fuels.

What is Ireland's highest-ever battery discharge from grid-scale storage?

On March 14th, Ireland recorded its highest-ever level of battery discharge from grid-scale storage, with nearly 300 MW of power being discharged at peak. This showcases the growing capacity of Ireland's energy storage systems and their pivotal role in ensuring energy supply during times of peak demand.

What is energy storage Ireland?

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Delivering the energy storage technologies to enable a secure, carbon free electricity system on the island of Ireland by 2035.

## Ireland solar Energy Storage Power Generation System

---

### Supporting Ireland's energy transition with battery energy storage

Supporting Ireland's energy transition with battery energy storage solutions. Wind and solar energy play a key role in Ireland's transition from fossil-fuel-based electricity generation.
