# Is a solar factory a glass factory

## Overview

---

Is glass-glass a trend in solar modules?

Researchers at the US Department of Energy's (DOE) National Renewable Energy Laboratory (NREL) are looking into the trend toward glass-glass regarding module durability.

What will be the supply source for the solar glass fab?

Solarcycle is planning a \$344 million solar glass fab in the US state of Georgia, supplied by recycled panel materials. "We're excited about the potential for domestic solar manufacturing growth to provide jobs and R&D development in the US," Solarcycle Chief Operating Officer (COO) Rob Vinje told pv magazine.

Why is a pattern glass production facility being built in China?

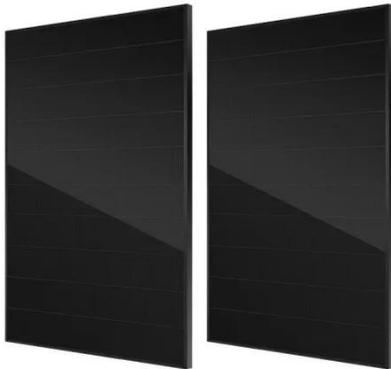

19.07.2021 - Environmental protection: With support of Grenzebach, pattern glass production facilities, specially to manufacture solar panels, are being built in China. China shares the worldwide goal to protect the environment, reduce CO2 emissions, and focus on renewable energies.

Why are solar glass suppliers investing in new production capacity?

As PV module capacity increases, glass suppliers are investing in new solar glass production capacity. New facilities are popping up in North America, with unique features to ensure competitiveness, such as using recycled material.
