**Is the glass sun room at the
door suitable for solar
installation**

Overview

What types of Windows work in a sunroom?

There are various types of window styles that will work in a sunroom, and many homeowners combine styles. Choosing a glass door, such as sliding doors or French doors, helps give your sunroom a consistent look and feel.

What makes a sunroom energy efficient?

Choosing a glass door, such as sliding doors or French doors, helps give your sunroom a consistent look and feel. You should work with your contractor to create the most energy-efficient sunroom possible, which includes making the proper window and glass selections. In many ways, windows are what make a sunroom.

Do you need exterior doors for a sunroom?

After you decide window style it's time to think about the doors you'll use for your sunroom. If you are installing a three-season sunroom, which lacks insulation against extreme heat or extreme cold, you'll likely want to install an exterior door from your home to the sunroom.

What type of doors go into a sunroom?

As for doors that lead from the sunroom into the outdoors, homeowners usually opt for French doors, single entry patio doors, or sliding doors. These doors are all made of glass, and thus fit well with a typical sunroom design. The type of door that you choose depends on your budget and style preferences.
