

EQACC SOLAR

Italian solar container battery project

Overview

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

What will Italy get from a battery storage tender?

Winning participants of the tender will receive fixed revenues over a 15-year contract for capacity made available to the grid. Italy broke new ground in energy storage with its very first battery storage auction, competitively awarding the full 10 gigawatt hours (GWh) of capacity put up for tender.

What is Italy's first battery storage auction?

Italy broke new ground in energy storage with its very first battery storage auction, competitively awarding the full 10 gigawatt hours (GWh) of capacity put up for tender. One standout among the awards is GreenVolt, which bagged a 499 MWh battery project in southern Italy's Calabria.

Who won Italy's first battery storage project auction?

Italy's first battery storage project auction competitively awarded a 10 GWh tender to Enel (major utility in Italy), GreenVolt, among others. Plenitude which is Eni's renewable arm also won two projects totaling to 500 MWh.

Italian solar container battery project

Italy - grid connection for 42 MW plant ...

The project and approval process - typically lengthy and complex in Italy - began in 2021, when battery energy storage systems ...
