Overview

How do you pack a dry cell nickel cadmium battery?

These batteries must be recycled, and they do have special packing and shipping requirements. Dry cell nickel-cadmium batteries that are higher than 9-volt must be packed so that the terminals do not touch each other. You can put conductive caps on them, bag them individually, place non-conductive tape on them, or use the original packaging.

Are nickel cadmium batteries a universal waste?

Nickel-cadmium batteries are also generally considered universal waste. Disposing of these batteries in landfills can cause soil contamination and water pollution. This is why they require special packaging and disposal. Here are some of the packaging and shipping requirements for some of the most common batteries classified as universal waste.
