

**EQACC SOLAR**

# **Kabul ups uninterrupted power supply inverter**

## Overview

---

What is an uninterruptible power supply (UPS) system?

Used across a wide range of applications and industries, Uninterruptible Power Supply (UPS) Systems are designed to provide a continuous source of input power despite mains failure, electrical surges and power interruptions.

Why should you choose ups7500wx?

In addition to UPS systems, we support all aspects of systems necessary for stable power supply, from the design of electrical facilities to the procurement and manufacture of equipment. The UPS7500WX has a footprint-saving design with a standard module configuration of 3,500 mm wide x 900 mm deep, providing more space for server equipment.

Are battery-backed uninterruptable power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptable power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

How does the ups7500wx save space?

The UPS7500WX has a footprint-saving design with a standard module configuration of 3,500 mm wide x 900 mm deep, providing more space for server equipment. Further space savings are achieved by eliminating the need for maintenance space on the back and sides of the panel. The need for maintenance space on the back and sides is eliminated.
