Does Kyrgyzstan manufacture PV modules?

At the same time, the literature review identified that a Kyrgyz-German company called New-Tek manufactures PV modules. Hence, in order to reduce the import taxes as well as to assess the performance of locally manufactured PV modules, the presented research selected a PV module of New-Tek from Kyrgyzstan for further simulations.

Is solar PV a suitable technology for sustainable electricity supply in Kyrgyzstan?

The study shows that the solar PV farm is a suitable technology for sustainable electricity supply in Kyrgyzstan over hydropower plants. The study further identifies the solution to bridge the gap between the technical potential of solar PV and market barriers.

1. Introduction.

Is Kyrgyzstan a good country for solar energy?

Despite social, environmental, and ecological and energy issues, the local government focused on building new hydropower plants. On the other hand, Kyrgyzstan is blessed with a great potential for solar energy because of its geographical characteristics which can ensure a sustainable power supply.

Is a large-scale solar PV farm feasible in Kyrgyzstan?

In response to that, the presented study performs the feasibility study of a large-scale solar PV farm in Kyrgyzstan. The simulation of the PV farm was developed by using the modeling software tool Polysun. The results of the simulation displayed great potential for solar energy, especially for a high-altitude region.
