

# Laos has invested in energy storage power stations

## Overview

---

What is the main energy source in Laos?

As of 2018, most of primary energy comes from coal (60.7%), followed by hydropower 30% and oil 18%. Hydropower is a significant resource in Laos, with 22.5 TWh electricity generated in 2018. However, the national electrification rate was 94.2% in 2017.

Which countries does Lao PDR supply electricity to?

The country's central location within the GMS allows it to supply electricity to sizable neighboring markets such as Thailand and Viet Nam; and to a lesser extent, also to Cambodia and Myanmar. Nearly half of the forthcoming hydropower projects in the Lao PDR are earmarked for cross-border exports.

What is the current electricity capacity of Laos?

The current electricity capacity of Laos is approximately 6,000MW. The Lao government expects to achieve a capacity of 14,000MW by 2020. They plan to install 54 more electricity transmission lines and build another 16 substations by 2020. Current number of high voltage electricity transmission lines: 53,000km.

How much does Laos earn from electricity exports?

Laos has earned USD 2,012 million from the export of electricity to other countries this year, up by 12 percent compared to last year. Deputy Prime Minister and Minister of Planning and Investment, Dr. Sonexay Siphandone told the National Assembly that Laos had exported 26,972 million kWh of power to other countries, according to Vientiane Times.
