# Latest Nordic solar base station prices

## Overview

---

Which countries produce the most electricity in the Nordic countries?

The Nordic electricity market covers Norway, Sweden, Finland, and Denmark, and as many as 12 price areas. The Nordic countries produce above 400TWh in a normal year of which around 50% hydro power, 20% nuclear, 20% wind and 10% CHP.

How does Nord Pool work?

Nord Pool calculates a price for each bidding area for each hour of the following day. The day-ahead market is an auction where power is traded for delivery each hour the next day. The Nord Pool markets are divided into several bidding areas.

Does Nord Pool update price indices?

This update is mandated externally and is not within our control. For users who require different resolutions, Nord Pool has introduced normalized price indices for a set resolution. The change only applies to delivery dates after go-live date.

Who is Nord Pool?

Nord Pool runs the leading power market in Europe, offering day-ahead and intraday markets to our customers. Trade power with us in 16 countries and benefit from related services such as compliance, data and knowledge-sharing.
