# Latvian container power generation equipment

## Overview

---

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

What is the EU's energy policy for Latvia?

The current EU policy dictates that Latvia must increase the share of renewable energy in its final energy consumption and Latvia has plans to reach 50 percent by 2030 according to the EU's National Energy and Climate Action Plan 2030. Much of Latvia's heat and electricity still comes from imported natural gas.

How can Latvia reduce its reliance on foreign sources of energy?

The Latvian government is interested in diversifying supplies and in developing more local resources to reduce the country's reliance on foreign sources of energy. To reach these targets, government agencies and entrepreneurs have discussed options to move beyond hydropower into wind and biomass power plants.

Is Latvia interested in wood biomass?

Over half of Latvia is covered by forest, so wood biomass presents excellent potential for further development. In addition to renewable energy projects, Latvia remains interested in pursuing a possible liquefied natural gas (LNG) terminal to enhance its energy supply source diversity.

## Latvian container power generation equipment

### Energy Storage Container Production in Latvia: Powering the ...

The Latvian Energy Puzzle: Why Storage Containers Matter Now Latvia's renewable energy capacity grew by 18% last quarter, but here's the kicker - nearly 30% of that potential gets ...

### Latvia: Latvenergo to deploy 250MW/500MWh BESS by 2030

Latvia state-owned utility and power generation firm Latvenergo intends to deploy 250MW/500MWh of BESS in the next five years.
