Lead-acid battery cabinet automation

Overview

Why is lead a global leader in lithium battery production?

Today, LEAD is a globally trusted provider, partnering with industry leaders to scale up lithium battery production, contributing significantly to the global transition towards clean energy. The global battery manufacturing industry is in the midst of an evolution driven by advanced automation, AI and the rapid rise in EV and energy storage demand.

How did lead help a new battery manufacturer?

Impact: By facilitating knowledge transfer and skill-building, LEAD enabled a new battery manufacturer to build a skilled team capable of managing production independently. This hands-on approach enabled the client to fast-track market entry, establish trust with customers, and achieve stable production capacity.

Which accumulator batteries are included in the cabinets covered by the technical specification?

The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries.

Why do we need automation in battery production?

Demand for lithium-ion batteries is booming. From smartphones and tablets to e-cars: nothing runs without batteries. Accordingly, the required quantities in battery production are increasing rapidly. The solution lies in automation. This is because the manufacture of batteries is technically demanding and requires high safety standards.

Lead-acid battery cabinet automation

 LFP 12V 100Ah

Battery Cabinets

The service life of lithium batteries is much longer than that of lead-acid batteries, which greatly reduces the maintenance frequency and replacement costs. Especially in remote areas of the
