# Lead-acid battery container

## Overview

---

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).

What is a lead acid battery container?

Lead Acid Battery Container - for safe battery storage and transportation. The Battery Transport & Storage (BTS) Container was purposely designed as a lead acid battery container, for the regulation compliant, safe and environmentally responsible storage and transportation of used lead acid batteries.

Are used lead acid batteries a hazardous waste?

Used Lead acid batteries or Car Batteries are classified as a hazardous waste. As a result their storage, handling and transportation is controlled by several Federal and State regulations. This fact sheet includes used lead acid battery / car battery storage requirements as well as US lead acid battery shipping / transport requirements.

What is a battery container?

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).

What are lead acid batteries used for?

Batteries collected mainly include car batteries and other automotive application but also include lead acid batteries used for solar, UPS and other industrial applications. The popularity of this service and the BTS Containers is growing every year. Why Wood Pallets Shouldn't Be Used For Transporting Lead Acid Batteries?
