## Overview

---

What is the energy sector like in Lesotho?

Transformation in Lesotho The energy sector in Lesotho is characterised by an enormous potential of renewable energy resources. Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1.

How much electricity does Lesotho produce?

Lesotho produces about 72 MW from hydropower (Meula). It has about 150 MW peak power and imports more than 70 MW mainly from Mozambique (29% of peak demand) and 20% of its peak demand from South Africa. The electricity supply accounts only for +/-50% in the energy mix.

Who supplies electricity in Lesotho?

In the present day, LEC remains the sole supplier of electricity operating within Lesotho, as well as holding the title of one of the first parastatals in the country. "Our Company operates under the obligation to supply power to all customers within our service territory," continues the Company.

Will Lesotho be able to produce electricity by 2030?

Universal Access by 2030. Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1,000 MW from hydropower. Lesotho submitted their first NDC in January 2017 which makes them recognised
