Lima Outdoor Power Charging

Overview

Will electric cars be recharged free of charge in Peru?

During the period of promotion of electric mobility, electric vehicles will be recharged free of charge, thus seeking a rapprochement with new energies in the Peruvian market. With the launch of the third electric station, the Lima-Ica route will become the first charging corridor for electric cars nationwide.

Will Lima-Ica become the first charging corridor for electric cars?

With the launch of the third electric station, the Lima-Ica route will become the first charging corridor for electric cars nationwide. This will allow users of electric cars that currently circulate nationwide to have autonomy.

Why should electric vehicles be connected to a charging infrastructure?

According to a review published in Energía Estratégica, the decree states that all charging infrastructure must be installed so that it can be connected to an electric vehicle in such a way that, under normal conditions of use, the transfer of energy works safely, that its operation is reliable and that risks to people and buildings are minimized.
